

DIAL BEFORE YOU DIG

SUPPLEMENTARY MATERIAL

OVERVIEW

Below are various links to information you will find useful during your course. Please keep them handy for reference.

TITLE	DESCRIPTION	LINKS
Guide to lodging a free Dial Before You Dig enquiry		https://www.1100.com.au/safety-information/guide-to-lodging-an-enquiry/
Best Practice Guides		https://www.1100.com.au/safety-information/best-practice-guides/
Utility Providers Code of Practice for WA	<p>The Utility Providers Code of Practice is published by the Utility Providers Services Committee to document industry best practice and provide essential information and guidance in managing and undertaking street works associated with the provision of underground utility services in public road reserves. The Code of Practice is an authoritative reference for utility services providers, local governments, developers and their contractors throughout WA.</p> <p>This document includes:</p> <ul style="list-style-type: none"> • Allocation of space for underground utility services • Pre-construction planning including locating existing services • Environmental and heritage compliance requirements • Installation and reinstatement requirements. • Recording of as constructed information. • Emergency contact details of all utility service providers. 	https://www.1100.com.au/wp-content/uploads/2019/02/UPSC-WA-Code-of-Practice-Rev-2-March-2019.pdf
Service Lines and Lead Ins	<p>Service lines and lead ins are the physical connection between your home and your property boundary. These are not usually included in the plans you will get from DBYD members.</p> <p>Please see the video starring Doug the Wombat on the DBYD YouTube channel about working around service lines and lead ins.</p>	https://www.youtube.com/watch?v= jD2hnpt9nM
